

How Financial Impact Works

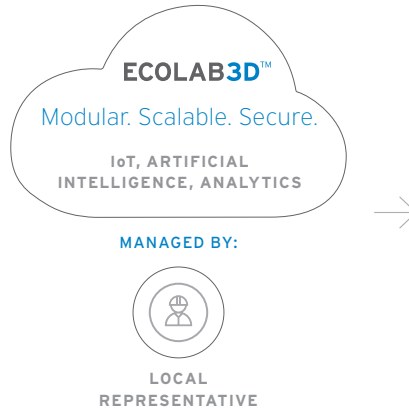

1 Data Input from Multiple Sources

Financial Impact aggregates and evaluates critical data from all of your value projects across your enterprise.

2 Financial Impact powered by ECOLAB3D™

Financial Impact provides an up-to-date view of the realized project savings, while projects are identified and managed at the local level by our representative.

3 Actionable Insights for Optimal Results

By quickly identifying what project matters the most, cross-seeding best practices, and multiply project savings, realizing more savings in real time.

Visibility into financial impact of projects

Rollups and drilldowns of water, energy and cost saved at each plant and totals across the enterprise

Detailed summary of key projects and next steps to remove roadblocks and drive execution
